

## About Safety Link

Looking after the health and safety of employees are critical for the wellbeing of any business, across all industry types, large or small.

We at Safety Link realize that becoming compliant with the Occupational Health and Safety Act and its relevant regulations might not be as straight forward for all.

We therefore strive to making compliance easy and affordable by offer our clients services according to their needs.

We specialize in the fields of Occupational Health and Safety Training, System Implementation, System Coordinating and Auditing.

**Our streamlined Health & Safety process ensures you get the service you need in a way that is fast and convenient for you.**

## Our Health & Safety Services

We provide a full range of Work Health and Safety Consulting Services that are tailored to your business needs. From initial assessment and system development; through to implementation and ongoing support.

### Internal Auditing & GAP Assessments

Our internal auditing service succeeds the Health and Safety System Implementation. It is one of the most essential aspects of any effective system. It gives a company an independent and objective view of the level of compliance of their current system and is designed to add value and improve a company's processes.

### Health & Safety System Implementation

For businesses to show compliance in respect of Occupational Health and Safety they need to have a documented health and safety system in place. It can range from fulfilling the requirements set out by the Occupational Health and Safety Act and its relevant regulations to ISO 45001 certification. Safety Link assist any size company to develop and implement a health and safety system specific to their industry-specific needs.

### System Co-ordinating

Our system coordinating service succeeds the Health and Safety System Implementation. Many a times businesses still need support after system implementation. This service assist businesses in successfully maintaining their health and safety system by fulfilling a Systems Coordinator function.

Safety Link offers a comprehensive range of training to suit your needs and requirements. The following Health and Safety Training are available:
